Orthofit System

Orthofit

Orthofit is a revolutionary product that has been developed by a team of footcare professionals in both Europe and America. This partnership of podiatrists, orthotists and material engineers has produced an orthotic that will fit easily into any shoe. Orthofit can be used to effectively treat:- Heal Pain, Knee Pain, Hip Pain, Lower Back Pain, Tendon and Ligament Pain, Plantar Fasciitis, Metatarsalgia & Shin Splints. Orthofit is designed to offer the correct profile in an elegantly thin, yet ultra strong high performance semi crystalline thermoplastic polymer material with a lifelong guarantee. Easy to fit, Orthofit can be used straight out of the pack or can be heat moulded to suit a patient's individual requirements. Warm the Orthofit in an oven to 120°C for approx. 1½ minutes. A worktop oven is available, please see below.

Choice of two types; with or without Metatarsal Dome, all sizes are UK

Cuxson Orthofit with Metatarsal Dome

Men's	3	4-5	6	7-8	9	10	11
Ladies	3-4	5	6-7	8	9	10	11

Cuxson Orthofit without Metatarsal Dome

Men's	2	3	4-5	6	7-8	9	10
Ladies	2	3-4	5	6-7	8	9	10

0479 Orthofit with Metatarsal Dome, pair £15.75

0486 Orthofit without Metatarsal Dome, pair £15.75

Powerstep Pinnacle

- Prescription like orthotic supports
- Stabilising heel cradles
- Hypurcel® inner foam for lifelong cushioning
- Soft outer EVA foam for added comfort

Men's	2-2½	3-3½	4-4½	5-5½	6-6½	7-7½	8-8½	9-9½	10-10½	11-11½	12-12½
Ladies	3½-4	4½-5	5½-6	6½-7	7½-8	8½-9	9½-10	10½-11	11½-12		

8387 Powerstep Pinnacle, pair £19.50

Cuxson Gerrard

Before
Unsupported Feet tend to roll inward. The arches flatten, stretching the tissue, while bones misalign

After
Feet with Powerstep are comfortably supported, bones correctly aligned and pain prevented

Orthofit Oven

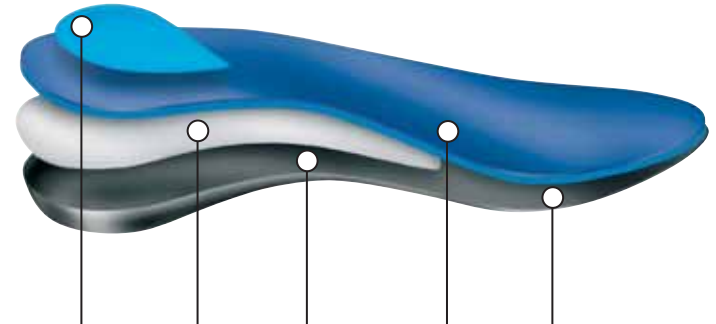

- Small bench top oven for moulding Orthofit
- Orthofit can be warmed in an oven to 120°C for approximately 1½ minutes

1583 Orthofit Oven £39.95

Powerstep Pro 5 Phase Design

orthotics

Vasyli Orthofit System

Over 25 years of experience and development combine to bring you the very latest generation heat mouldable custom orthotic solutions. Designed specifically for fast, easy and effective use, our unique range of orthotic products represent the very best value treatment solutions currently available for medical professionals and their patients.

VASYLI CUSTOM ORTHOTICS

Available in regular $\frac{3}{4}$ length and full length in three densities

LOW

MEDIUM

HIGH

For a full list see page 7

Rubbed nylon with footfresh deodorising cover eliminates odour and moisture build up

Deep heel cup stabilises heel position to maximise control

The ability to control foot function in all cardinal planes: Frontal traverse-Sagittal

Lateral grid: prevents lateral shifting of the heel cup during the strike phase

Metatarsal raise assists function of the metatarsals

Sorbon shock dot- designed to dissipate force along the angle of strike

Balanced rearfoot forefoot ensures correct foot function

Rear foot Angular restraining mechanism "ARM" controls frontal plane motion (calcaneal eversion) STC: (Sustentacula Tali Control) the control point for the rear foot Wedge

Sagittal plane control- assists in controlling midfoot alignment

1st ray plantarflexor- assists function of the 1st ray, a major stabilising influence on the forefoot

A range of Vasyli additions and wedges are available see page 10

3407 Bosch Heat Gun £27.95

Vasyli Custom Regular 3/4 length & Full-length VASYLI Medical®

Men's	3½-7	7½-12
Ladies	4-7½	8-12½

2836 Heel Pain Orthotic/Stabiliser 6°, pair £16.50

Vasyli Howard Dananberg

VASYLI Signature RANGE

Professional orthotic device with removable 1st Ray Sections

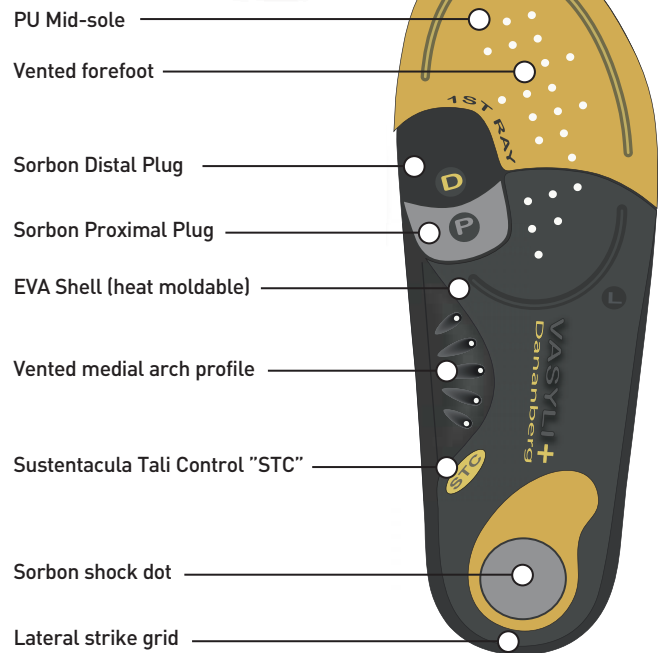

The flexibility of the design of the VHD allows for a wide combination of applications to address your patient's Tri-Planar motion problems.

Due to the variations experienced in the length of a patient's foot/toes, the plugs can be removed when the orthotic is fitted, ensuring the head of the 1st MPJ coincides with the removed plug. In cases where maximum effect is required (Structural Hallux Limitus - SHL), both plugs can be removed offering a larger path of least resistance to the joint in an effort to enhance 1st ray function. In addition to the removable plugs, this orthotic is also heat mouldable, to personalise the rearfoot control.

Men's	3-4 ¹ / ₂	5-6 ¹ / ₂	7-8 ¹ / ₂	9-10 ¹ / ₂	11-12 ¹ / ₂

Vasyli McConnell® Slimfit

VASYLI Signature RANGE

For heeled shoes

The Vasyli - McConnell Slimfit has made fitting orthotics into women's high heels and sandals a whole lot easier. With a new slimmer profile and enhanced metatarsal support, the Vasyli McConnell Slimfit device 'disappears' under the foot making it the perfect solution for footwear that will not accommodate a standard orthotic.

- Enhanced metatarsal control
- Slim design to fit most heeled shoes & sandals
- Dual density
- Supports & re-aligns
- Compatible with Vasyli orthotic component additions
- Strong adhesive underside ensures a secure fit within footwear

Ladies	3 ¹ / ₂ -5	5 ¹ / ₂ -7	7 ¹ / ₂ -9	9 ¹ / ₂ -11
--------	----------------------------------	----------------------------------	----------------------------------	-----------------------------------

2758 McConnell Slimfit, pair £18.99

Biobasics

BIOBASICS™ CIS has ten self-adhesive, interchangeable components per pair, offering the clinician the widest possible range of prescription options, dispensed easily and quickly at chair-side. With endless prescription options, BIOBASICS™ is the most complete, versatile, easy to use, and cost-effective Component Insole System available.

- EVA insoles with a longitudinal arch support, a metatarsal dome, and a deep heel cup
- Comfortable, brushed cotton top cover
- First metatarsal head cut-outs and calcaneal dells with removable and replaceable EVA plugs
- Self-adhesive 3° forefoot valgus wedges, 4° rear foot varus wedges, and 5mm heel lifts
- Replacement set of EVA plugs
- Patient instructions with trim lines to fit to shoes

Sizes Small 3-5 Medium 6-8 Large 9-11 X-Large 12-14

9013 Biobasics, pair £18.00

Airwalk

Airwalk™ offers the wearer a unique combination of cushioning, shock absorption, and stability-straight out of the bag. It is a tri-laminate insole, with each layer offering its own unique benefits.

- The top layer provides a plush, brushed-cotton fabric interface between the insole and the foot
- First engineered by NASA for the Apollo missions, the truly "space-age" Memory Foam second layer contours to the shape of the foot with every step
- The contoured polyurethane bottom layer is designed to provide for shock absorption at heel-strike; and it cradles the heel and supports the arch for foot stability at mid-stance

Incredibly versatile

Diabetics, and rheumatoid arthritics with painful callosities and sites prone to ulceration; athletes with blisters and symptoms due to high impact sports; patients with plantar forefoot inflammation, metatarsalgia, arch strain, heel pain, etc. - the list goes on

Sizes: Trim to fit
